

PSYCGN26: Research Methods I: Lecturer: Peter Martin

[View Online](#)

The Research Methods module is taught on Tuesday mornings in the first term at the Anna Freud Centre. The aim of the module is to equip students with thorough knowledge of research design, ethics, and methodological principles, and an introduction to methods for collecting and analysing qualitative and quantitative data. The Research Methods module aims to help students to become both better producers and consumers of psychological research. It is designed to teach the fundamental concepts, methods and skills students will need for carrying out and interpreting high quality research.
